WORK EXPERIENCE

Freelance— Web Developer

Ziwa-vita Project

February 2022

- Use WebFlow to create a CMS Website.
- Creative ideas provided for Web Design and UI/UX.
- Collaborated with an experienced co-worker.

PROJECT EXPERIENCE

1) Point of Sale Web Application

This project is tailored for restaurant owners and managers and comprises two web applications: the ***Back Office App*** and the ***Order App***.

Demo Link - <https://github.com/NHWai/happy-pos-nextapp-nhwai>

Github Link - <https://happy-pos-nextapp-nhwai.vercel.app/>

Back Office App Features

- User Authentication via Google Sign-In.
- Menu and add-ons management, with CRUD control exclusive to owners.
- Location and Table QR Code management, restricted to owners.
- Order management for both owners and managers, with managers limited to order tasks.

Order App Features

- Customers may place orders by conveniently scanning the QR code located at their table.
- On the Order List page, customers have the ability to review their orders and monitor the status of each order.

Challenges and Outcomes

- Database Normalization
- Context Management (useContextApi)
- Learned integration of PostgreSQL with NextJs Framework
- Used Prisma Object Relational Mapping (ORM)
- Learned NextJs(Page Router) with TypeScript
- Learned MaterialUI template engine
- OAuth authentication

2) *Movie Review Web Application*

A simple movie review sharing app where you can save your favorite movies and browse the taste of others.

Demo Link - <https://github.com/NHWai/happy-pos-nextapp-nhwai>

Github Link - <https://github.com/NHWai/movie-app> (frontend)

Github Link - <https://github.com/NHWai/movie-app-api> (backend)

Features

- Authentication (login /logout using json web token)
- Upload Movie Info (exclusive to registered users)
- Give Reviews/Ratings (exclusive to registered users)
- Registered users can share their reviews and ratings, with the overall rating reflecting everyone's input.
- Search by Genres
- Theme (Light/Dark)
- Fully Responsive

Challenges and Outcomes

- ExpressJs Framework
- Learned integration of MongoDB with ExpressJs Framework
- React Library with TypeScript
- Used Mongoose Object Data Modeling (ODM) library
- Learned state management with Redux Toolkit
- Learned MaterialUI template engine
- Learned the implementation of JsonWebToken authentication for secure user access control.

Skills

HTML • CSS • JavaScript • TypeScript • React • NodeJS • NextJS • Git
